

## Lumina Spark Participants Testimonials:

*"This is the most practical and inspirational method for raising our staff's self-awareness and improving communication that I have ever experienced."*

*"The Lumina program has made me a more reflective person and administrator. I reflect on how I respond and communicate with others. I think that what I have learned about myself and others using the Lumina program, will make me an effective school leader. I have learned what I need to do in order to motivate others at work. I am being more reflective about my staff and students and what Lumina traits they have."*

*"I have a staff with many people who don't know each other. I also have a staff where I think people are keen to improve their practice and know themselves better as leaders and learners. The Lumina Portrait is jam-packed with excellent, realistic information that helps to shed light on ourselves. There are affirmations of why things are the way they are and why we do what we do. I wanted my staff to spend time learning about themselves and how they relate to each other, in order to build a solid interdependent team."*

*"This went beyond what I was expecting in terms of my professional/personal needs. I found this both comprehensive and applicable. I am still discovering information as I read through my portrait a second and third time."*

*"It was like opening up a book about myself. I really enjoy learning about ways that I can improve my interactions with people and how I can work more effectively with my leadership style. It also gave me some great insight into others."*
